RESEARCH EXPERIENCE

Individual Tree Detection, Segmentation for Urban Greening Project

MAY. 2024 – PRESENT

Full-time Student Researcher (Advisor: Dr. John Wilson, and Dr. Yi Qi)

- Developed detection and segmentation models using aerial imagery to identify and segment individual trees.
- Designed a training and prediction workflow for LA city administrators, enabling them to count trees and calculate canopy areas using GIS, without the need for coding skills.

Homeless Encampment Detection and Counting Project

FEB. 2024 – PRESENT

Full-time Student Researcher (Advisor: Dr. Abdullah Alfarrarjeh)

- Led a team in data cleaning and statistical analysis, including labeling and developing an ensemble model capable of handling various conditions (occlusion, truncation, blurring) using mobile cameras.
- Conducted comparative studies on 144 trained models and preparing a research paper.

Spatial Pattern Mapping using Street View: Human Perception Project MAR. 2024 – SEP. 2024
Volunteer Student Researcher (Advisor: Dr. Siqin Wang)

- Conducted data collection at 50-meter intervals across Los Angeles County using GIS software, Python libraries, and 360-degree imagery from Google and Mapillary Street View APIs.
- Applied machine learning methods, including segmentation and classification, to analyze Street View imagery for sentiment analysis of various locations.
- Visualized spatial patterns of six human emotions (Beautiful, Wealthy, Livable, Safe, Boring, Depressing) to map urban perception.

Truck Detection and Counting Project MAY. 2023 – MAY. 2024
Full-time Student Researcher (Advisor: Dr. Seon Ho Kim)

- Published two research papers as the first author while leading a team of 7 in synchronized data collection and labeling using RGB and infrared videos.
- Developed a truck detection and tracking system with YOLOv5 and DeepSORT, enabling monitoring under various light conditions.
- Provided research data to USC Keck Medical School, supporting environmental studies on the impact of truck traffic on residential areas.

Web-based Academic Integration Platform for STEM Students Project FEB. 2020 – SEP. 2022
Research Assistant, Web Developer (Advisor: Dr. Enyoung Kang)
NRF(National Research Foundation of Korea) Fund

- Led the development of a web service for data collection and visualization, supporting STEM students from four universities with database modeling and implementation.
- Conducted longitudinal network analysis to examine changes in student friendships and academic motivation over time.
