RESEARCH EXPERIENCE

Individual Tree Detection, Segmentation for Urban Greening Project

MAY. 2024 – PRESENT

Full-time Student Researcher (Advisor: Dr. John Wilson, and Dr. Yi Qi)

- Developed detection and segmentation models using aerial imagery to identify and segment individual trees.
- Designed a training and prediction workflow for city and county officials, enabling them to count trees and calculate canopy areas using GIS, without the need for coding skills.

Homeless Encampment Detection and Counting Project

FEB. 2024 – PRESENT

Full-time Student Researcher (Advisor: Dr. Abdullah Alfarrarjeh)

- Led a team in data cleaning and statistical analysis, including labeling and developing an ensemble model capable of handling various conditions (occlusion, truncation, blurring) using mobile cameras.
- Conducting comparative studies on 144 trained models and preparing a research paper.

Spatial Pattern Mapping using Street View: Human Perception Project

MAR. 2024 – SEP. 2024

Volunteer Student Researcher (Advisor: Dr. Siqin Wang)

- Conducted data collection at 50-meter intervals across Los Angeles County using GIS software, Python libraries, and 360-degree imagery from Google and Mapillary Street View APIs.
- Applied machine learning methods, including segmentation and classification, to analyze Street View imagery for sentiment analysis of various locations.
- Visualized spatial patterns of six human emotions (Beautiful, Wealthy, Livable, Safe, Boring, Depressing) to map urban perception.

Truck Detection and Counting Project

MAY. 2023 – MAY. 2024

Full-time Student Researcher (Advisor: Dr. Seon Ho Kim)

- Led a team of 7 in synchronized data collection and labeling with RGB and infrared videos, conducted experiments, and published the research paper as the first author
- Utilized YOLOv5 for object detection and DeepSORT model for tracking to detect and count trucks in various light conditions
- Provided research data to USC Keck Medical School for environmental monitoring, contributing to studies on the impact of truck traffic on residential areas.

Web-based Academic Integration Platform for STEM Students Project

FEB. 2020 – SEP. 2022

Research Assistant, Web Developer (Advisor: Dr. Enyoung Kang)

NRF(National Research Foundation of Korea) Fund

- Led the development of a web service for data collection and visualization involving STEM students from four universities.
- Designed and modeled database structures, including the creation of ER diagrams and development of database schema.
- Conducted longitudinal network analysis to observe and analyze changes in student friendships and academic motivation over time.
